

Graph Drawing Contest 2018

Game of Thrones

www.yworks.com/GoT

The graph presents the relationship of the characters of the Game of Thrones TV show. The 84 characters are grouped by their house and drawn on radial layers that depict generations. In a house, solid edges between characters show marriages, love interests, and parenthood. Loyalty and family ties of characters of different houses are condensed into dotted and solid edges between new house nodes in the central circle. Blood-red edges on radial paths in the outskirts show killings.
